

Crosscrake CE Primary School

Our School promotes 'Friendship & Learning' underpinned by the Christian values of kindness, perseverance & hope.

Jesus said, "I have come that you may have life; life in all its fullness"

John 10:10.

Intent

We intend to deliver a computing curriculum that prepares pupils to live safely in an increasingly digital British society where pupils can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems.

It is our intention to enable children to find, explore, analyse, exchange and present information. We also focus on developing the skills necessary for children to be able to use information in a discerning and effective way. We want children to know more, remember more and understand more in computing so that they leave primary school computer literate. Computing skills are a major factor in enabling children to be confident, creative and independent learners and it is our intention that children have every opportunity available to allow them to achieve this.

Our computing curriculum aims to ensure all pupils can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems.

Implementation

A clear scheme of work provides coverage in line with the National Curriculum. Teaching and learning facilitates progression across all key stages within the strands of digital literacy, information technology and computer science.

Children will have access to the hardware (computers, tablets, programmable equipment) and software that they need to develop knowledge and skills of digital systems and their applications

Children will have the opportunity to explore and respond to key issues such as digital communication, cyber-bullying, online safety, security, plagiarism and social media.

The importance of online safety is shown through displays.

Parents are informed when issues relating to online safety arise and further information/support is provided if required.

Impact

Children will be confident users of technology, able to use it to accomplish a wide variety of goals, both at home and in school.

Children will have a secure and comprehensive knowledge of the implications of technology and digital systems. This is important in a society where technologies and trends are rapidly evolving.

Children will be able to apply the British values of democracy, tolerance, mutual respect, rule of law and liberty when using digital systems.
